## WORK EXPERIENCE

### Junior React Developer Connectlab

10/2021 - Present

Gujarat, India

#### Roles and Responsibilities:

- Delivered high-quality, robust production code for mental health websites and other web portals using ReactJS, Next.js, HTML, CSS, JavaScript, and other web development technologies [🔗](#)
- Improved Nextjs website performance from **33% to 99%**, ensuring rapid loading and cross-browser compatibility [🔗](#)
- Collaborated with designers to implement **responsive designs** and **pixel-perfect layouts** for the website
- Implemented **Crash Analytics** for web portals
- Integrated **Google reCAPTCHA** for secure authentication
- Developed **HTML Email Templates** for mailers using SendGrid

### Frontend Web Developer Collaberus Technologies

02/2021 - 05/2021

Delhi, India

#### Roles and Responsibilities:

- Developed a Landing page website showcasing the company's identity using HTML5, CSS3, and Bootstrap 4 [🔗](#)
- Collaborated with designers and implemented responsive designs for the company's product website [🔗](#)
- Utilized Git for version control and collaborated with other developers on code reviews

## PERSONAL PROJECTS

### Weather Web App [🔗](#)

- Built a dynamic weather app with real-time updates via the Geolocation API and Open Weather API. Detects location or allows city search, with dynamic backgrounds and animations.
- Project Link: <https://whatisweathernow.netlify.app>.

### MacOS UI Clone [🔗](#)

- I have created the macOS operating system's user interface clone using ReactJS. My project includes the Login Page, Docks, New Folder Creation, WiFi Connection, Control Center, Apple Menu, Restart Window, Launchpad, and much more.
- Project Link: <https://macosui.netlify.app>.
- (Project Login Password = 1234)\*

### Google Keep Clone [🔗](#)

- I have created a Google Keep clone where users can add, delete, and manage notes with titles and descriptions. Built with reusable React components, responsive design, and effective state management.
- Project Link: <https://googlekeepapp.netlify.app>.
