Relevant Experience

Frontend Developer | Connect Lab, Gujarat – (Oct 2021 – Present)

- Deliver high-quality, robust production code for mental health websites and other web portals using ReactJs, HTML, CSS, Js, and other front-end development technologies.
- Collaborated with designers and implemented responsive designs and pixel-perfect layouts of websites.
- Developed and maintained reusable components using ReactJS.
- Optimized web pages for performance and ensured cross-browser compatibility and ensured that they load quickly.
- Utilized Git for version control and collaborated with other developers on code reviews.
- Developed HTML Email Templates for mailers using SendGrid.

UI Developer | Collaberus Technologies – (Feb 2021 – May 2021)

- Developed and maintained websites using HTML, CSS, Bootstrap, and other front-end development technologies.
- Collaborated with designers and implemented responsive designs and pixel-perfect layouts of websites.

Projects

Weather Web App – Project link: <https://whatisweathernow.netlify.app/>

I developed a responsive weather app with real-time updates based on your current location or city you searched for and integrated the Geolocation API and Open Weather API for accuracy. The app features dynamic backgrounds and animated text for an enhanced user experience.

MacOs Ui Clone – Project Link: <https://macosui.netlify.app/>

(Note: Project Login Password = 1234)

I designed and developed the same user interface of the macOS operating system using ReactJs, in which I have covered the Login Page, Docks, New Folder, Open Window, Spotlight, Battery Status, Wifi Connection, App Menu, Status Menu, Control Center, Apple Menu, Restart Window, Launchpad, and a lot more.

Google Keep Clone – Project Link: <https://googlekeepapp.netlify.app>

I developed a Google Keep clone that allows users to set titles and descriptions for their notes and add multiple notes. I created reusable React components, managed state and props, and implemented responsive design.
